

Enterprise Deployment Optimisation Program for Apple:

Uplift your Apple environment.

Solution Expert
Education

Authorised
Service Provider

Many education institutions have already taken the first steps in adopting Apple's Device Enrollment Program to simplify the deployment and management of Apple devices. However, to ensure that the full benefits of the solution are realised, IT departments often benefit from some expert assistance to optimise the deployment processes and system configuration.

At JB Hi-Fi Education, we understand that deploying and supporting new technology and devices can be a daunting task for an already stretched IT Team. As such, we have a team of engineers experienced in integrating Apple technology ready to provide advice and support at each step of your Apple journey.

Modernise your Apple processes

Our Enterprise Deployment Optimisation Program for Apple ensures that your environment is compliant with your organisation's device policies while also providing you with a best practice approach that follows Apple's guidelines in maintaining an up-to-date and optimised fleet of devices.

From general consultancy around your existing environment to assisting you in achieving automation and zero touch deployments, the program can be tailored to suit your business needs. The result: employees that stay productive and a reduced need to actively manage technology.

Program Benefits

- Optimisation of Mac deployment workflow
- Assessment of your Apple environment and key productivity apps for compatibility with latest releases of Apple Operating Systems
- On-site and remote consultancy

Key activities

- Enrolment in Apple's Enterprise programs
- Proactive health checks of your Apple ecosystem and deployment strategies
- Tuning of your Apple device workflows
- Technology transfer to your IT Team

Why work with JB Hi-Fi Education?

Our strong partnership with Apple extends the advantages of user choice through easy procurement, roll-out and management of Apple's complete device portfolio. Our Apple certified professionals align with best practices for implementation, so you can be confident that your systems and devices are managed, secure and working as expected.
